## PROJECTS

Chat Application (02/2024 - 03/2024)

- Collaborated with a team to develop a chat application using the MERN (MongoDB, Express.js, React, Node.js) stack. My primary responsibilities included designing and implementing the frontend interface and managing user authentication. The application supports real-time messaging with a responsive and user-friendly UI, optimized for various devices.

E-commerce Store Website (React.js)  
(01/2024 - 02/2024)

- Developed a feature-rich E-commerce website using React.js, including a landing page with featured categories and products, product listing with sorting and filtering, user authentication, wish list and cart management, product details, search functionality, and responsive UI elements like toasts and loaders. This project highlights my ability to create dynamic and user-friendly web applications.
